

ICHTY TE

+1 (705) 770-1303 | ichty086@gmail.com | linkedin.com/in/ichty-te | github.com/Tyyy09

Full-stack software developer with a design background, building reliable applications end to end from data model and backend logic to polished, responsive interfaces.

TECHNICAL SKILLS

Languages: Java, C#, TypeScript, JavaScript, Python, PHP, C++, HTML, CSS

Frameworks & Tools: Spring Boot, ASP.NET, React, Vite, Gradle, JUnit, Git & GitHub, Azure Cloud

Databases & Data: MySQL, SQL Server, PostgreSQL, data modeling, validation & cleaning

Design & Other: Figma, Adobe Creative Suite, AutoCAD, MS Office 365

EXPERIENCE

Tiger White Group UX/UI Designer - Phnom Penh, Cambodia

Feb 2023 – Jan 2024

HTML, CSS, JavaScript, ReactJS, Figma

- Built responsive, component-based interfaces in React, HTML, CSS, and JavaScript, translating Figma designs into working front-end.
- Gathered requirements from 5+ cross-functional stakeholders and turned business needs into deliverable specs across 10+ digital projects.
- Produced 80+ marketing materials and creative assets through an organized workflow, improving brand consistency and on-time delivery.

HACKATHONS

AutoHack 2.0 - 2nd Place Honda EQM · Team Ctrl Alt Elite

Mar 2026 · Georgian College, Barrie ON

C++, Arduino, scikit-learn, Groq API, Llama 3.3-70b, PostgreSQL

- Built a predictive equipment-failure monitor for Honda in 24 hours — architected a sensor-to-insight pipeline (Arduino → PostgreSQL → scikit-learn anomaly detection → Llama 3.3-70b) turning raw sensor data into plain-language maintenance alerts.
- Engineered Arduino firmware with DS18B20 temperature and MPU-6050 vibration sensors to capture real-time machine-health data.
- Led a cross-functional team across firmware, ML and UI tracks under the deadline to ship a fully working prototype, placing 2nd overall.

PROJECTS

RAYM Sneaker Store

Nov 2025 – Dec 2025

PHP, MySQL, CSS · Dockerized · deployed on Railway / Render

- Built a CRUD e-commerce store (20+ products) on a normalized MySQL schema, with customer browse/order flows and an admin inventory & pricing panel.
- Implemented server-side validation across all CRUD operations for reliable data integrity and shipped it on a Dockerized PHP backend with a managed database.

KromTrip - Group Travel Planner

Personal Product

React, Vite, Firebase (Cloud Firestore), Vercel

- Built a real-time group-travel app end to end: authentication, itineraries, automatic expense settle-up and chat, all syncing live through Cloud Firestore.
- Developed a responsive, component-based UI across 11 screens with a clean sign-in-to-planning flow, optimized for fast load times.

Employee Management REST Service

HPE Software Engineering Simulation

Java, Spring Boot, Gradle, JUnit

- Built a RESTful service in Spring Boot with layered controller/service/data classes and JSON GET/POST endpoints, verified by passing JUnit & MockMvc tests.

EDUCATION

Diploma in Computer Programming & Co-op - Georgian College

Expected Dec 2026

GPA 3.3 / 4.0 · Coursework: OOP, Web Development, Data Structures & Algorithms, Networking, Mobile & Pervasive Computing

Bachelor of Architectural Design

2023 – 2024

GPA 3.4 / 4.0 · Coursework: 3D & 2D Modeling, Visual Design, UX/UI Design
